Solution Developer – iTech Mission Pvt Ltd

May 2025 – Present

- Build scalable back-end services and front-end for government data solutions.
- Enhance REST APIs using Python-Flask, focusing on debugging.
- Collaborate in agile cycles with UI/UX and QA teams.

Freelance Software Developer

Remote • 2023 – Present

- Delivered mobile apps and automation scripts for small businesses.
- Specialized in ERP systems and API-based translation tools.

Technical Skills

- **Languages:** Python, Java, HTML, CSS, JavaScript
- **Frameworks/Tools:** Flutter, Firebase, MySQL, MongoDB, Django, Flask, Git, Docker, Linux, REST APIs
- **Competencies:** Debugging, Open Source, Agile

Projects

MAUSTATS –

- Worked on the MAUSTATS international project and my role was to create Python Backend API using Django rest frame work.
- Also helped in Adding new features such as merge and append to the API.

Library Management System –

- Built a Python-MySQL desktop app for book issuance, returns, and fine tracking.
- Added controls to restrict issuance until returns are cleared.

Aravity ERP Android App –

- Developed a Flutter-Firebase app for real-time attendance and announcements for college and students.
- Integrated Google Sheets API for dynamic data management.

Screen Sharing Library –

- Created a Python library for real-time screen sharing in virtual classrooms.
